

Amendments to the Specification:

Please insert the paper copy of the Sequence Listing filed herewith following the Oath/Declaration.

Please replace the paragraph beginning at page 4, line 17, as with the following amended paragraph:

The EBNA2₂₈₀₋₂₉₀ peptide epitope typically contains a motif (Phe-Tyr-Asn-Ile-Pro-Pro-Met-Pro-Leu; ~~SEQ ID NO:2~~ SEQ ID NO:6) that is predicted to bind to HLA class I molecules (e.g., HLA-A24 and HLA-Cw*0401). It therefore is understood that in the compositions, methods, and articles of manufacture of the invention, the relevant HLA molecules can be HLA class I molecules (e.g., HLA-A24 or HLA-Cw*0401) as well as HLA class II molecules.
